

Sustainable Timber Procurement Policy

Procladd (Scotland) Ltd is a well-known respected company renowned for providing Building Envelope Solutions. Our business has been established for over 25 years, during which time we have assembled a team of professionals who are committed to achieving high standards of environmental and quality performance.

To support this we maintain an Environmental Management System designed to meet and comply with the requirements of the internationally recognised BS EN ISO 14001 standard.

We are committed to the continual improvement of our environmental performance and support the sustainable sourcing of timber.

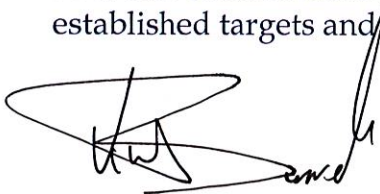

As a procurer of timber and wood-based products, Procladd (Scotland) Ltd recognise that we have a responsibility to current and future generations and will therefore strive to promote sustainable forest management. By demanding products from sustainably managed forests, we aim to stimulate the improvement of forest management and discourage unsustainable management practices.

We at Procladd (Scotland) Ltd will give preference to suppliers who can demonstrate that their products originate from sustainably managed forests. We consider it important that the origin of our wood-based products can be demonstrated through credible, independent Chain of Custody certification based on international standards and norms. In this context, we recognize credible third-party certification systems accepted by government procurement policies and guidelines, such as the Programme for the Endorsement of Forest Certification (PEFC) and the Forest Stewardship Council (FSC).

It is the responsibility of all Directors, Staff and Sub-Contractors of Procladd (Scotland) Ltd to be aware of and assist in the achievement of these aims. Progress is regularly reviewed through established targets and feedback is actively welcomed.

Keith W Burrell
Chief Executive Officer
