

Sustainable Timber Procurement Policy

Procladd (Scotland) Ltd & Procladd (Small Works) Ltd provide high quality innovative and robust Building Envelope Solutions to suit our client's needs. We operate under a management system certified to Standards BS EN ISO 9001, BS EN ISO 14001 and BS EN ISO 45001.

Procladd maintain an Environmental Management System and are committed to the continual improvement of our environmental performance and the sustainable sourcing of timber.

As a procurer of timber and wood-based products, Procladd recognise that we have a responsibility to current and future generations and will therefore strive to promote sustainable forest management. By demanding products from sustainably managed forests, we aim to stimulate the improvement of forest management and discourage unsustainable management practices.

We at Procladd will give preference to suppliers who can demonstrate that their products originate from sustainably managed forests. We consider it important that the origin of our wood-based products can be demonstrated through credible, independent Chain of Custody certification based on international standards and norms. In this context, we recognize credible third-party certification systems accepted by government procurement policies and guidelines, such as the Programme for the Endorsement of Forest Certification (PEFC) and the Forest Stewardship Council (FSC).

It is the responsibility of all Directors, Staff and Sub-Contractors of Procladd to be aware of and assist in the achievement of these aims. Progress is regularly reviewed through established objectives and feedback is actively welcomed.
