THE WAID ACADEMY

Anstruther

The replacement of an ageing 130-year-old school in Anstruther was funded by Fife Council and The Scottish Government as part of the 'Building Fife's Future Programme'. The new Waid Academy and Community Hub comprises of an 800-pupil school, local council and police officer base, gym & fitness suite, café, public library and auditorium.

For the roof a standing seam system was selected with acoustic properties to help reduce the noise over the auditorium. We installed 952m² of Elite Plus 5 and 2436m² of Elite Plus 5A1 from Euroclad's Euroseam range to the main building. The sheets were all rolled on site to avoid any transport problems occurring. Vieo Aluminium finished 25/454 profile in anthracite was selected for the 2400m² of the wall cladding.
